

# Ayopa Module

## Installation

Clear the store cache under var/cache and all cookies for your store domain. Disable compilation for Magento 1.4+. This step eliminates almost all potential problems. It's necessary since Magento uses cache heavily.

### Backup Your Data

Backup your store database and web directory.

### Download and Extract

Download and unzip extension contents on your computer and navigate inside the extracted folder.

### Step 1 - Upload Files

Navigate inside *step\_1* directory. Using your FTP client upload content of *step\_1* directory to your store root. This will not overwrite your app directory, it will add the new files to this directory.

### Edit shipping\_method.phtml Template File

In your web directory, check your theme for /app/design/frontend/*yourtheme*/template/checkout/onepage/shipping\_method.phtml. If this file does not exist in your theme, navigate to app/design/frontend/base/template/checkout/onepage.

Edit shipping\_method.phtml as indicated:

Change this code:

```
<button type="button" class="button" onclick="shippingMethod.save();">
```

To this:

```
<button type="button" class="button" onclick="ayopaSubmit();">
```

Add this code before the </form> tag in the file:

```
<?php echo $this->getChildHtml('ayoparegistration') ?>
```

### Edit addtocart.phtml Template File

In your web directory, check your theme for /app/design/frontend/*yourtheme*/template/catalog/product/view/addtocart.phtml. If this file does not exist in your theme, navigate to app/design/frontend/base/template/catalog/product/view.

Add this code where you would like the GroupBuy button to appear:

```
<?php echo $this->getChildHtml('ayopagroupbuy') ?>
```

## Edit text.phtml Template File

In your web directory, check your theme for  
/app/design/frontend/*yourtheme*/template/catalog/product/view/options/type  
/text.phtml. If this file does not exist, navigate to  
app/design/frontend/base/template/catalog/product/view/options/type.

Edit text.phtml as indicated:

Change this code:

```
<dt><label<?php if ($_option->getIsRequire()) echo ' class="required"' ?><?php  
if ($_option->getIsRequire()) echo '<em>*</em>' ?><?php echo $this->  
>htmlEscape($_option->getTitle()) ?></label>  
    <?php echo $this->getFormattedPrice() ?></dt>
```

To this:

```
<?php if ($_option->getTitle() != 'GroupBuyNSave'): ?>  
<dt><label<?php if ($_option->getIsRequire()) echo ' class="required"' ?><?php  
if ($_option->getIsRequire()) echo '<em>*</em>' ?><?php echo $this->  
>htmlEscape($_option->getTitle()) ?></label>  
    <?php echo $this->getFormattedPrice() ?></dt>  
<?php endif; ?>
```

This will hide the Ayopa label in the Custom Options display.

## Edit default.phtml file (Optional)

This change gives your customer's an explanation of the GroupBuyNSave item in  
their cart. In your web directory, check your theme for  
/app/design/frontend/*yourtheme*/template/checkout/cart/item/default.phtml. If  
this file does not exist, navigate to  
app/design/frontend/base/template/checkout/cart/item/.

Edit text.phtml as indicated:

Change this code:

```
<dt><?php echo $this->htmlEscape($_option['label']) ?></dt>  
<dd><?php if (isset($_formattedOptionValue['full_view'])): ?>  
class="truncated"<?php endif; ?><?php echo $_formattedOptionValue['value'] ?>
```

To this:

```
<?php if($_option['label'] == "GroupBuyNSave"): ?>
    <dl class="item-options">
        <dt>GroupBuyNSave</dt>
        <dd>You are buying at the published price but will be rebated the
        difference via paypal when the GroupBuy ends. New users will
        receive an email showing how to easily track this purchase and
        rebate via facebook. The current GroupBuy price is <?php echo
        Mage::helper('ayopamodule')->getCurrentPrice($_option['value']);
        ?>. Proceed with your checkout as usual and you will be prompted
        to register for Ayopa GroupBuy if you are not already
        registered.</dd>
    </dl>
<?php else: ?>
    <dt><?php echo $this->htmlEscape($_option['label']) ?></dt>
    <dd><?php if (isset($_formattedOptionValue['full_view'])): ?>
        class="truncated"<?php endif; ?><?php echo
        $_formattedOptionValue['value'] ?>
    <?php endif; ?>
```

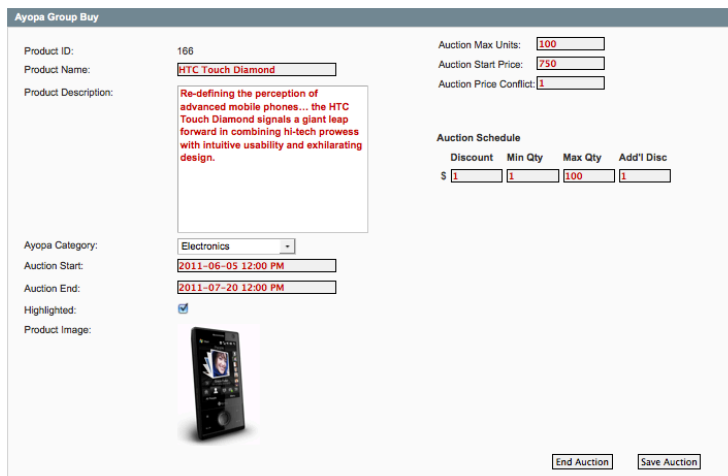

# Configuration

## Enter Ayopa Credentials

In the admin, go to System → Configuration. Under Ayopa Settings, click Configuration. Enter your Ayopa username (email) and password. Save Config.

## Create GroupBuy for Product

In the admin, go to Catalog → Manage Products → Edit a product → Ayopa. Click the New Auction button. Enter the auction information. Click Save Auction.

The screenshot shows the 'Ayopa Group Buy' configuration form. It includes fields for Product ID (166), Product Name (HTC Touch Diamond), and Product Description (Re-defining the perception of advanced mobile phones...). There are also fields for Auction Max Units (100), Auction Start Price (750), and Auction Price Conflict (1). The Auction Schedule section shows a table with columns for Discount, Min Qty, Max Qty, and Add'l Disc, with values \$ 1, 1, 100, and 1 respectively. The form also includes fields for Ayopa Category (Electronics), Auction Start (2011-06-05 12:00 PM), Auction End (2011-07-20 12:00 PM), and a checkbox for Highlighted. A product image of the HTC Touch Diamond is shown at the bottom left. At the bottom right, there are buttons for 'End Auction' and 'Save Auction'.

Discount	Min Qty	Max Qty	Add'l Disc
\$ 1	1	100	1
